PROFILE

AI Agent Architect and Automation Specialist who builds intelligent AI agent systems that run real business operations — bookings, orders, customer support and delivery coordination — end to end. I also produce AI-driven video marketing. I work with businesses across hospitality, logistics and construction, turning everyday operations into automated, around-the-clock systems.

EXPERIENCE

AI Agent Architect & Founder

Current

NoyanAI.Au

- Founded NoyanAI.Au, building custom AI agent systems for businesses that want to scale great service without adding headcount.
- Design small teams of AI agents that handle bookings, orders, emails, customer support and delivery coordination automatically, 24/7.
- Deliver jargon-free AI strategy and hands-on builds — not just advice.

AI Agent Development — Hospitality & Construction

Current

Hotels, restaurants & construction companies

- Building AI agents for hotels and restaurants to automate bookings, orders and customer enquiries.
- Developing AI agents for construction companies to streamline operations and coordination.

AI Video Marketing

Current

DHL & construction-sector clients

- Producing AI-driven video marketing content for DHL.
- Creating AI video marketing for clients in the construction sector.

CORE EXPERTISE

- AI agent design & orchestration
- Customer-facing AI assistants
- Workflow integration with existing tools
